Florida Reporting Regions - Inside Back Cover

INTRODUCTION

The document, published annually, has as its primary purpose, the provision of an abstract of statistical information covering the broad field of education in Florida school districts. The volume includes a selection of data from many of the surveys conducted by the Department plus the summarization of information from legislatively mandated reports. Included in this selection of data are information on students enrolled in school, graduation information, staff counts by a variety of categories, and teacher salary data. Supplemental information on the number of schools and similar pieces of data are also provided.

The Profiles are divided into six major sections. Each section contains information about each of the five reporting regions in Florida plus information about each of the districts within the regions. A front section provides summarized information about the State.

There have been no changes in data definitions from previous editions of the Profiles documents.
